## Guide for Customer

Customers should be able to log in and Choose products they need to shop at their nearest stores or any store so they can drive to the location of the store, place an order they will get order id, now they are ready to pick up at the store by showing order id.

# Affinity

## Guide for Admin

They can log in to the Merchant dashboard and add, delete products available in the shop to show to the customers. When customer orders they are placed in their dashboard, then they need to pack the things what customers ordered they make a bill. When the customers show up at the shop. They will be able to give their respective orders who show the order id.
